In 2021...

Flashpoint customers **saved** a total of 10K+ hours with Flashpoint Request for Information (RFI) custom analyst research intelligence

A customer **identified and secured** at-risk accounts containing $10.1M using OCR capabilities

A financial services customer **identified** an average of 125 account screenshots with $6M at risk on a monthly basis

During an October incident, Flashpoint provided customers an estimated $1.38M in potential **fraud loss avoidance** with our Card Fraud offering; one customer was able to **mitigate** $72K in fraud losses

New Products + Services

Identify Card Exposure, Prevent Fraud, and Take Action

Payment and Credit Card Fraud Mitigation

Helps teams detect stolen credit cards enabling them to block fraudulent transactions and reissue stolen credit cards before they are used, which saves time, money, and reputational risk.

Monitor For Brand Impersonation, Stop Typosquatting, and Request Takedowns

Domain Monitoring

Provides teams the ability, resources, and insight into observed domain phishing activity related to the organization; eliminates threats such as typosquatting, phishing attacks, and brand impersonation through logo detection.

Social Media Monitoring

Enables users to identify fake or duplicate accounts targeting the brand, enterprise, or employees from social media sites.

Mobile App Monitoring

Provides the ability to monitor official mobile app stores, third parties, and directory sites for fraudulent apps that are targeting or impersonating a brand.

Takedown Management

Proactively alerts users to malicious URLs, fake social media accounts, as well as fraudulent mobile apps; provides the ability to action via takedown services to remove malicious assets directly in the Flashpoint Intelligence Platform.

Address Critical Risk, Save Time, and Augment Your Security Team

Managed Intelligence

Provides specialized, proven Flashpoint services that enable security teams to exponentially scale their operations to combat and mitigate threats to their organization.

Identify Leaked Assets; View Extent of Exposure and Damage due to an Extortion Incident

Extortion Monitoring Service

Delivers real-time automated alerts of identified leaked assets as a result of an extortion incident, providing teams the necessary insight into the extent of exposure and damage.

Enhancements to the Flashpoint Intelligence Platform

Optical-Character Recognition (OCR) Capabilities

Identify text, logos,and objects from multimedia within Flashpoint collections.

Introduction of Social Media Collections

In addition to Reddit, Gab, MeWe, Raddle, 4chan etc., view Twitter data to identify potential threats and discussions related to your organization.

Expansion of Sources for Data Exposure Alerting

Internet and Cloud Infrastructure Sources: Monitor your digital footprint for potential vulnerabilities and identify publicly exposed AWS S3 buckets.

Automated Translations to Expand Search Results

Flashpoint pre-translates our datasets across 25+ languages, providing a wider range of search results from foreign language sources within Flashpoint collections.

Expansion of the Flashpoint Partner Integrations Ecosystem
