

Comprehensive Risk Management and Cyber Intelligence for Every Team

Flashpoint and Risk Based Security's combined offering is the central place for organizations to gain insight into all facets of cyber and physical intelligence - essential to identifying, prioritizing, remediating, and monitoring risks affecting an organization.

An organization's risk lifecycle is complex and continuous, covering a variety of risk categories. It's imperative that teams have the tools, context and insights needed to rapidly identify threats and focus remediation efforts on the most important risks in order to protect the organization's key assets.

Risk Categories

- ✓ Cybercrime
- ✓ Vulnerabilities & Exploits
- ✓ Fraud Loss Avoidance
- ✓ Compromised Credentials
- ✓ Emergent Malware & Ransomware
- ✓ Physical Threats
- ✓ Data Breaches
- ✓ Third Party & Vendor Risk
- ✓ Insider Threats
- ✓ Disruption & Destruction Attacks
- ✓ Product Security & Secure Development

RISK INTELLIGENCE LIFECYCLE

With Flashpoint and Risk Based Security, organizations can:

DETECT VULNERABILITIES

Detect pre-CVE vulnerabilities, breach data, and other threats and prioritize remediation efforts based on threat actor intelligence

COMBINE INTELLIGENCE

Seamlessly combine these critical data sources to provide CTI, Vulnerability Management, Fraud, Third-Party Risk and DevSecOps teams the most comprehensive view of risks and vulnerabilities

DRIVE COLLABORATION

Enable effective collaboration across security teams to remediate risks faster which reduces security and development costs, and protects the reputation risk of the organization, their customers and shareholders

The Single Source for Threat, Vulnerability and Risk Management

Risk Based Security's comprehensive vulnerability and data breach intelligence, paired with the threat actor intelligence and advanced data collections from Flashpoint, helps customers protect their most critical assets and manage risk across the lifecycle. This powerful combination enables organizations to remediate the most severe risks by leveraging three key capabilities:

HIGHLY ADVANCED COLLECTIONS

- Powerful collections capabilities covering unique online communities, forums, marketplaces and chat services
- Uncover where threat actors are talking about vulnerabilities, exploits, breaches, ransomware and insider threats
- Sophisticated technology and advanced data collections informed by Flashpoint analysts

ACTIONABLE INTELLIGENCE

- Real-time alerts on vulnerabilities, leaked credentials, data breaches and threats before they are widely known
- Contextual awareness on how threats and vulnerabilities are being discussed and exploited by threat actors
- Actionability through dashboards, analytics, APIs and workflow automation

FULL RISK LIFECYCLE SUPPORT

- Rapidly identify threats and prioritize actions based on organizational asset importance and risk scores
- Focus remediation efforts on high severity security risks more likely to have a negative impact
- Solutions designed for security teams, backed by Flashpoint intelligence analyst support

ABOUT FLASHPOINT

Trusted by governments, global commercial companies, and educational institutions, Flashpoint helps organizations protect their most critical assets, infrastructure, and stakeholders from security risks such as cyber threats, ransomware, fraud, physical threats, and more. Leading security practitioners—including cyber threat intelligence (CTI), vulnerability management, DevSecOps and vendor risk management teams—rely on Flashpoint's intelligence platform to proactively identify and mitigate risk and stay ahead of the evolving threat landscape.
